

Anything but Ordinary Plastic Cards

Your customers want cards that are appealing, innovative and distinguish their brand. That's where we come in. Contact us today!

EXPERTISE We deliver an unrivaled depth of experience printing specialty coatings on plastic, with over 20 years of experience working with plastic card manufacturers and more than 200 million special effects produced on plastic card in the past 12 months alone.

SPECIAL EFFECTS Using the highest quality inks & coatings available, we print a wide variety of special effects, including glitter, gloss, pearl, metallic, scratch n sniff, textures, glow-in-the-dark, prism (just to name a few). Depending upon design, effects can be printed pre or post litho and pre or post lamination.

R&D Our research & development department focuses full time technical expertise, creating custom inks & coatings especially for use on plastic cards. We work closely with our clients and invite you to be part of the design process.

PARTNERSHIP We add value, far beyond the special effects we print, by providing education to our partners about the screen printing process and consultation with regard to design and card construction.
